February 2014
Volume 52, Number 1

Korean Chem. Eng. Res., 52(1) 1-140(2014)
PISSN 0304-128X, EISSN 2233-9558

Review

Research and Development of Functional Colorants Materials	Kun Jun and Young-A Son	1
Microalgae Cultivation Using LED Light	Dae Geun Kim and Yoon-E Choi	8
Feedstock Recycling Technology from Polyester Wastes	Sanghwan Jo, Gunhyung Kim, Minjeong Cho, Myungwan Han and Kyungsuk Kang	17
Electrodeposition for the Fabrication of Copper Interconnection in Semiconductor Devices	Myung Jun Kim and Jae Jeong Kim	26

Article

Industrial Chemistry(Electrochemistry, Analytical Chemistry) · Catalysis/Reaction Engineering · Drug Delivery System ·

Functional Coating Technology

Synthesis of N-cyclohexylmaleimide and Preparation of It's Purified Particles	Bu-Hyun Moon and Chang-Sik Ju	40
Bioconversion Strategy in Conversion of Lignocellulosic Biomass upon Various Pretreatment Methods using Sulfuric Acid and Aqueous Ammonia	Roent Dune Cayetano, Tae Hyun Kim and Byung-Hwan Um	45
Electrochemical Characteristics of Hybrid Capacitor using Core-shell Structure of MCMB/Li ₄ Ti ₅ O ₁₂ Composite	Hyoung Shin Ko, Jeong Eun Choi and Jong Dae Lee	52
Electrochemical Synthesis of Ammonia from Water and Nitrogen using a Pt/GDC/Pt Cell Hana Jeoung, Jong Nam Kim, Chung-Yul Yoo, Jong Hoon Joo, Ji Haeng Yu, Ki Chang Song, Monika Sharma and Hyung Chul Yoon		58
The Effect of Reactant Composition on the Synthesis of Resole-Type Phenolic Bead	Dongseok Hahn and Hongkyeong Kim	63

Process System Engineering · Plant Design, Transport Phenomena · Process Safety · Plant Engineering

Numerical Studies on the Effects of the Channel-Inlet-Pressure Difference in the Pressure-Retarded Osmosis (PRO) Power System	Sung Soo Hong, Won Ryoo, Myung-Suk Chun and Gui Yung Chung	68
Effects of Solutally Dominant Convection on Physical Vapor Transport for a Mixture of Hg ₂ Br ₂ and Br ₂ under Microgravity Environments	Geug-Tae Kim and Moo Hyun Kwon	75

Powder Technology · Fluidization Engineering · Climate Change Technology · Fuel Conversion Technology

Operating Characteristics of a Continuous Two-Stage Bubbling Fluidized-Bed Process	Pil-Sang Youn and Jeong-Hoo Choi	81
---	----------------------------------	----

Separation · Technology, Thermodynamics, Membrane Technology, Supercritical Fluid Extraction, Ionic Liquids

Microalgal Oil Recovery by Solvent Extraction from Nannochloropsis oceanica	Ji-Yeon Park, Gye-An Lee, Keun-Yong Kim, Ki-Yong Kim, Sun-A Choi, Min-Ji Jeong and You-Kwan Oh	88
--	--	----

Biochemical Engineering · Biochip Technology · Biomedical Technology

Perchlorate Removal by River Microorganisms in Industrial Complexes	Kang-Ick Jo and Yeonghee Ahn	92
The Effect of pH and Temperature on Lysozyme Separation in Ion-exchange Chromatography	Kwan-Young Ko and In-Ho Kim	98
Stagnation of Droplet for Efficient Merging in Microfluidic System	Si Hyung Jin, Jongmin Kim, Sung-Chan Jang, Young Moo Noh and Chang-Soo Lee	106

Energy/Environment · New Renewable Energy · Waste Treatment/Energy Recovery Technology

Pretreatment of Kenaf Core by Combined Electron Beam Irradiation and Water Steam for Enhanced Hydrolysis	Jin-Young Lee, Byoung-Min Lee, Joon-Pyo Jeun and Phil-Hyun Kang	113
Environmental Impact of Soil Washing Process Based on the CO ₂ Emissions and Energy Consumption	Do-Hyung Kim, Bo-Ram Hwang, Namguk Her, Sangjo Jeong and Kitae Baek	119
A Field Study on Electrokinetic Removal of Salts from Greenhouse Soil	You-Jin Lee, Jeong-Hee Choi, Seong-Ju Sim, Tae-Hyun Ha and Hyun-Goo Lee	126
Reaction Rate Analysis of Combustion for Indonesian Coal Char Applied by External/Internal Diffusion	Chan-Won Hwang, Ryang-Gyoon Kim, Kwang-II Ryu, Ze-Lin Wu and Chung-Hwan Jeon	133
