

The Korean Journal of Chemical Engineering

March 2011
Volume 28, Number 3

Korean J. Chem. Eng. 28(3) 633-986
Print ISSN 0256-1115
Online ISSN 1975-7220

INVITED REVIEW PAPER

-
- Yun Suk Huh, Sang Jun Jeon, 633 **Microfluidic extraction using two phase laminar flow for chemical and biological applications**
Eun Zoo Lee, Ho Seok Park,
and Won Hi Hong

PROCESS SYSTEMS ENGINEERING, PROCESS SAFETY

-
- Hyung Kun Bae, Sung Young Kim, 643 **Simulation of CO₂ removal in a split-flow gas sweetening process**
and Bomsock Lee
- Lida Simasatitkul, 649 **Reactive distillation for biodiesel production from soybean oil**
Pimpatthar Siricharnsakunchai,
Yaneeporn Patcharavorachot,
Suttichai Assabumrungrat,
and Amornchai Arpornwichanop
- Won So, Young-Hun Kim, 656 **Optimal layout of additional facilities for minimization of domino effects based on worst-case scenarios**
Chang Jun Lee, Dongil Shin,
and En Sup Yoon
- Hongbin Liu and ChangKyoo Yoo 667 **Performance assessment of cascade controllers for nitrate control in a wastewater treatment process**
- Umer Zahid, Youngsub Lim, 674 **CO₂ geological storage: A review on present and future prospects (Journal Review)**
Jaeheum Jung, and Chonghun Han

TRANSPORT PHENOMENA

-
- Cholthicha Amornsirirat, 686 **Experiment and 3D simulation of slugging regime in a circulating fluidized bed**
Benjapon Chalermnsinuwat,
Lursuang Mekasut,
Prapan Kuchonthara,
and Pornpote Piumsomboon
- In Gook Hwang and Min Chan Kim 697 **Onset of buoyancy-driven instability in a pure melt solidified from above**

CATALYSIS, REACTION ENGINEERING

-
- Wen-Tao Yi, Chun-Yan Yan, 703 **Kinetic study on carbonation of crude Li₂CO₃ with CO₂-water solutions in a slurry bubble column reactor**
and Pei-Hua Ma
- Saet Byul Kim, Su Jin You, 710 **Dehydration of D-xylose into furfural over H-zeolites**
Yong Tae Kim, SangMin Lee,
Hyokyuu Lee, Kihyun Park,
and Eun Duck Park
- Zhenye Ma, Rujun Wu, Qiaorong Han, 717 **Preparation of well-dispersed and anti-oxidized Ni nanoparticles using polyaminoamine dendrimers as templates and their catalytic activity in the hydrogenation of *p*-nitrophenol to *p*-aminophenol**
Rizhi Chen, and Zhenggui Gu
- Xingjun Yao, Changfeng Zeng, 723 **Two-step continuous synthesis of tetraethylthiuram disulfide in microstructured reactors**
Chongqing Wang, and Lixiong Zhang
- Dipali Prvine Upare, Songhun Yoon, 731 **Nano-structured porous carbon materials for catalysis and energy storage (Journal Review)**
and Chul Wee Lee
- Su Jin You, In Gu Baek, Yong Tae Kim, 744 **Direct conversion of cellulose into polyols or H₂ over Pt/Na(H)-ZSM-5**
Kwang-Eun Jeong, Ho-Jeong Chae,
Tae-Wan Kim, Chul-Ung Kim,
Soon-Yong Jeong, Tae Jin Kim,
Young-Min Chung, Seung-Hoon Oh,
and Eun Duck Park

INDUSTRIAL CHEMISTRY

- Mohammad Kanafchian, Masoomeh Valizadeh, and Akbar Khodaparast Haghi 751 **Prediction of nanofiber diameter for improvements in incorporation of multilayer electrospun nanofibers**
- Hee Jong Lee, Doyoung Seung, Igor N. Filimonov, and Hwayong Kim 756 **Etherification of glycerol by isobutylene. Effects of the density of acidic sites in ion-exchange resin on the distribution of products**
- Mohammad Kanafchian, Masoomeh Valizadeh, and Akbar Khodaparast Haghi 763 **Fabrication of nanostructured and multicompartmental fabrics based on electrospun nanofibers**

ENVIRONMENTAL ENGINEERING

- Ke He, Ho Jung Hwang, and Il Shik Moon 770 **Air gap membrane distillation on the different types of membrane**
- Ling Tao, Guangbo Zhao, and Rui Sun 778 **Combustion gas and NO emission characteristics of hazardous waste mixture particles in a fixed bed**
- Yogesh Chandrakant Rotliwala and Parimal Amaratlal Parikh 788 **Thermal degradation of rice-bran with high density polyethylene: A kinetic study**
- Guntae Son and Seunghwan Lee 793 **Application of micellar enhanced ultrafiltration and activated carbon fiber hybrid processes for lead removal from an aqueous solution**
- Peng Luo, Bing Zhang, Yafei Zhao, Jinhua Wang, Haoqin Zhang, and Jindun Liu 800 **Removal of methylene blue from aqueous solutions by adsorption onto chemically activated halloysite nanotubes**
- Youngchul Byun, Kiman Lee, Jeonghyun Kim, Dong Jun Koh, and Dong Nam Shin 808 **Preliminary evaluation of NaClO₂ powder injection method for mercury oxidation: Bench scale experiment using iron-ore sintering flue gas**
- Choong Jeon 813 **Removal of As(V) from aqueous solutions by waste crab shells**
- Taesup Moon, Yejin Kim, Hyosu Kim, Myungwon Choi, and Changwon Kim 817 **Fuzzy rule-based inference of reasons for high effluent quality in municipal wastewater treatment plant**
- Chia Chay Tay, Hong Hooi Liew, Chun-Yang Yin, Suhaimi Abdul-Talib, Salmijah Surif, Afiza Abdullah Suhaimi, and Soon Kong Yong 825 **Biosorption of cadmium ions using *Pleurotus ostreatus*: Growth kinetics, isotherm study and biosorption mechanism**
- Donghee Park, Dae Sung Lee, and Jong Moon Park 831 **Consideration of the methods for evaluating the Cr(VI)-removing capacity of bio-material**

BIOTECHNOLOGY

- Bulent Akay, Suna Ertunc, Havva Boyacioglu, Hale Hapoglu, and Mustafa Alpbaz 837 **Discrete system identification and self-tuning control of dissolved oxygen concentration in a stirred reactor**
- Yanping Wang, Qi Meng, Wen Gao, Jianhua Hou, and Zaheer Ahmed 848 **Expression and purification of beefy meaty peptide in *Pichia pastoris***
- Cheng Zhou, Bo Jiang, Zecui Sheng, Shemin Zhu, and Shubao Shen 853 **Covalent crowding strategy for trypsin confined in accessible mesopores with enhanced catalytic property and stability**
- Paulraj Kanmani, Ramraj Satishkumar, Neelakandan Yuvaraj, Kupusamy Alagesan Paari, Vellaiyan Pattukumar, and Venkatesan Arul 860 **The role of environmental factors and medium composition on bacteriocin production by an aquaculture probiotic *Enterococcus faecium* MC13 isolated from fish intestine**
- Borkar Prita, Khobragade Chandrahas, P. Venkata Ramana, Bodade Ragini, and M. Swetha 867 **Immobilization and stabilization of *Pseudomonas aeruginosa* SRT9 lipase on tri(4-formyl phenoxy) cyanurate**
- Yuh-Shuen Chen, Bing-Lan Liu, and Yaw-Nan Chang 875 **Effects of light and heavy metals on *Cordyceps militaris* fruit body growth in rice grain-based cultivation**

- Mi Ae Yoo, Young Keun Song, Hyein Jang, Dong Myung Kim, and Sang Yo Byun 880 **Profiling of skin anti-aging related proteins in human dermal fibroblasts by decursin in *Angelica gigas* Nakai**
- Hwa Sung Shin 886 **Analytical studies of Jacobson's necessary condition for fed-batch singular control optimization (Rapid Communication)**
- DuBok Choi, On-You Choi, Jong Park, Han-Seok Kim, and Ran Kim 890 **Potential application of acetone extract of *Astragalus sinicus* Linne seed to functional cosmetics**

SEPARATION TECHNOLOGY

- YunHai Wu, Li Jiang, XianMiao Mi, Bin Li, and ShiXun Feng 895 **Equilibrium, kinetics and thermodynamics study on biosorption of Cr(VI) by fresh biomass of *Saccharomyces cerevisiae***
- Mahdi Pourafshari Chenar, Houman Savoji, Mohammad Soltanieh, Takeshi Matsuura, and Shahram Tabe 902 **Removal of hydrogen sulfide from methane using commercial polyphenylene oxide and Cardo-type polyimide hollow fiber membranes**
- Tao Zhu, Wentao Bi, and Kyung Ho Row 914 **Adsorption of carbon dioxide on ionic liquids-modified active carbons and amino-modified polymer (Rapid Communication)**
- Abbasali Arabi, Jafar Mahmoudi, Hamid Saradar, Ahmad Jafarzade, and Mahdiyar Ghasemi 917 **Liquid+liquid equilibria of ternary water+carboxylic acid+solvent systems at 288.15 K**
- Fei Wang, Ting Chen, Yazhuo Shang, and Honglai Liu 923 **Two-phase aqueous systems of cetyltrimethylammonium bromide/sodium dodecyl sulfate with and without polyethylene glycol**
- In Seob Kwak, Sung Wook Won, Sun Beom Choi, Juan Mao, Sok Kim, Bong Woo Chung, and Yeoung-Sang Yun 927 **Sorptive removal and recovery of nickel(II) from an actual effluent of electroplating industry: Comparison between *Escherichia coli* biosorbent and Amberlite ion exchange resin**
- Lanping Nong, Chengliang Xiao, and Wei Jiang 933 **Azo dye removal from aqueous solution by organic-inorganic hybrid dodecanoic acid modified layered Mg-Al hydrotalcite**

THERMODYNAMICS

- Mehdi Baniasadi, Sattar Ghader, and Hassan Hashemipour 939 **Modifying GMA equation of state for description of (P, ρ , T) relation of gas and liquids over an extended pressure range**
- Bahman Zarenezhad, Mona Mottahedin, and Ali Haghighi Asl 949 **Effect of CO₂ concentration on the performance of different thermodynamic models for prediction of CH₄+CO₂+H₂O hydrate equilibrium conditions**

MATERIALS (Organic, Inorganic, Electronic, Thin Films)

- Florian J. Stadler 954 **Dynamic-mechanical behavior of polyethylenes and ethene/ α -olefin-copolymers: Part II. α - and β -relaxation**
- Yourong Wang, Yafang Chen, Siqing Cheng, and Liangnian He 964 **Improving electrochemical performance of LiMnPO₄ by Zn doping using a facile solid state method**

POLYMER, FLUIDIZATION, PARTICLE TECHNOLOGY

- Chitta Ranjan Mohanty and Bhim Charan Meikap 969 **Studies on solid mean residence time in a three-stage gas-solid fluidized bed with downcomer**
- Dae Ho Lim, Ji Hwa Jang, Yong Kang, and Ki Won Jun 974 **Flow behavior of wakes in a three-phase slurry bubble column with viscous liquid medium**
- Jamshid Behin and Tahereh Shojaeimehr 980 **Influence of high density particles in reduction of axial dispersion in liquid fluidized bed with residence time distribution curve studies**
