

The Korean Journal of Chemical Engineering

December 2012
Volume 29, Number 12

Korean J. Chem. Eng. 29(12) 1657-1840
Print ISSN 0256-1115
Online ISSN 1975-7220

INVITED REVIEW PAPER

-
- Chang Hyun Ko, Sung Hoon Park, 1657 Upgrading of biofuel by the catalytic deoxygenation of biomass
Jong-Ki Jeon, Dong Jin Suh,
Kwang-Eun Jeong,
and Young-Kwon Park

RAPID COMMUNICATION

-
- Sung-Hee Shin, Gha-Young Kim, 1666 Use of biologically designed gold nanowire for biosensor application
Joonmok Shim, Jungok Kim,
Hor-Gil Hur, Don-Jung Lee,
Jong-In Song, and Seung-Hyeon Moon
- Ji-Ho Yoon 1670 A theoretical prediction of cage occupancy and heat of dissociation of THF-CH₄ hydrate

PROCESS SYSTEMS ENGINEERING, PROCESS SAFETY

-
- Young Han Kim 1674 Development of process model of a rotary kiln for volatile organic compound recovery from coconut shell
- Young Han Kim 1680 Energy saving and thermodynamic efficiency of a double-effect distillation column using internal heat integration

TRANSPORT PHENOMENA

-
- Min Chan Kim 1688 Onset of radial viscous fingering in a Hele-Shaw cell

CATALYSIS, REACTION ENGINEERING

-
- Jae Ryul Park, Byoung Kyu Kwak, 1695 Effect of acid type in WO_x clusters on the esterification of ethanol with acetic acid
Dae Sung Park, Tae Yong Kim,
Yang Sik Yun, and Jongheop Yi
- Cong-Ming Tang, Xin-Li Li, 1700 A highly efficient catalyst for direct synthesis of methyl acrylate via methoxycarbonylation of acetylene
and Gong-Ying Wang

ENERGY

-
- Achanai Buasri, Bussarin Ksapabutr, 1708 Biodiesel production from waste cooking palm oil using calcium oxide supported on activated carbon as catalyst in a fixed bed reactor
Manop Panapoy, and Nattawut Chaiyut
- Chaiyot Tangsathitkulchai, 1713 Rheology and fuel properties of slurries of char and bio-oil derived from slow pyrolysis of cassava pulp residue and palm shell
Piyarat Weerachanchai,
and Malee Tangsathitkulchai

ENVIRONMENTAL ENGINEERING

-
- Ji-Won Yoon, Mi-Hwa Baek, 1722 Photocatalytic degradation of azo dye using TiO₂ supported on spherical activated carbon
Ji-Sook Hong, Chang-Yong Lee,
and Jeong-Kwon Suh
- Taik-Nam Kwon and Choong Jeon 1730 Selective adsorption for indium(III) from industrial wastewater using chemically modified sawdust
- Maria Harja, Gabriela Buema, 1735 Low cost adsorbents obtained from ash for copper removal
Daniel-Mircea Sutiman,
Corneliu Munteanu, and Daniel Bucur

- Yang-Soo Won 1745 **Comparison for thermal decomposition and product distribution of chloroform under each argon and hydrogen reaction atmosphere**
- Ponnusamy Senthil Kumar, 1752 **Kinetics, mechanism, isotherm and thermodynamic analysis of adsorption of cadmium ions by surface-modified *Strychnos potatorum* seeds**
Rangasamy Gayathri,
Chandrasekaran Senthamarai,
Muthukumar Priyadharshini,
Panimayam Sebastina Anne Fernando,
Ramakrishnan Srinath,
and Vaidyanathan Vinoth Kumar

BIOTECHNOLOGY

- A. Thirumurugan, S. Ramachandran, 1761 **Biological synthesis of gold nanoparticles by *Bacillus subtilis* and evaluation of increased antimicrobial activity against clinical isolates**
Neethu Anns Tomy, G. J. Jiflin,
and G. Rajagomathi
- Ali Shokuhi Rad, 1766 **A new electrochemical biosensor for hydrogen peroxide using HRP/AgNPs/cysteamine/p-ABSA/GCE self-assembly modified electrode**
Mohsen Jahanshahi, Mehdi Ardjmand,
and Ali-Akbar Safekordi
- Jae Yong Song, Eun-Yeong Kwon, 1771 **Antibacterial latex foams coated with biologically synthesized silver nanoparticles using *Magnolia kobus* leaf extract**
and Beom Soo Kim

SEPARATION TECHNOLOGY, THERMODYNAMICS

- Mansoor Anbia, Vahid Hoseini, 1776 **Synthesis and characterization of nanocomposite MCM-48-PEHA-DEA and its application as CO₂ adsorbent**
and Sakineh Mandegar zad
- Ravi Shankar Singh 1782 **Kinetics, thermodynamic and equilibrium study of Cr(VI) adsorption from aqueous solutions by NCL coal dust**
and Monoj Kumar Mondal
- Bahram Mokhtari 1788 **Extraction of alkali metals using emulsion liquid membrane by nano-baskets of calix[4]crown**
and Kobra Pourabdollah
- Gab-Jin Hwang and Ho-Sang Choi 1796 **Multiple tube preparation characteristics of silica hydrogen permselective membrane**

MATERIALS (Organic, Inorganic, Electronic, Thin Films)

- Myung-Gi Jeong, Kai Zhuo, 1802 **Formation of nanoporous nickel oxides for supercapacitors prepared by electrodeposition with hydrogen evolution reaction and electrochemical dealloying**
Serhiy Cherevko,
and Chan-Hwa Chung

POLYMER, INDUSTRIAL CHEMISTRY, FLUIDIZATION, PARTICLE TECHNOLOGY

- Maria Karsheva, Silviya Georgieva, 1806 **Rheological behavior of sun protection compositions during formulation**
and Silvia Alexandrova
- Young Cheol Park, Sung-Ho Jo, 1812 **Simultaneous removal of H₂S and COS using Zn-based solid sorbents in the bench-scale continuous hot gas desulfurization system integrated with a coal gasifier**
Ho-Jung Ryu, Jong-Ho Moon,
Chang-Keun Yi, Yongseung Yoon,
and Jeom-In Baek
