

The Korean Journal of Chemical Engineering

May 2012
Volume 29, Number 5

Korean J. Chem. Eng. 29(5) 549-692
Print ISSN 0256-1115
Online ISSN 1975-7220

JOURNAL REVIEW

Moon-Sun Kim, Ji Sun Kim, 549 Removal of gaseous toluene by using TiO₂ film doped of Ru-dye/Pt in a pilot scale
and Byung-Woo Kim photoreactor

Surachai Artkla 555 Photodecomposition of polyphenols in *E. camaldulensis* leaves in the presence of
hybrid catalyst of titania and MCM-41 synthesized from rice husk silica

RAPID COMMUNICATION

Jung Hwan Ha and Joong Kon Park 563 Improvement of bacterial cellulose production in *Acetobacter xylinum* using byprod-
uct produced by *Gluconacetobacter hansenii*

Nguyen Van Duc Long 567 Design and optimization of a dividing wall column by factorial design
and Moonyong Lee

PROCESS SYSTEMS ENGINEERING, PROCESS SAFETY

Joongwon Lee, Seik Park, 574 Effects of burner type on a bench-scale entrained flow gasifier and conceptual mod-
Haikyung Seo, Miyeong Kim, eling of the system with Aspen Plus
Simoon Kim, Junhwa Chi,
and Kitae Kim

Ming-Li Yeh and Chuei-Tin Chang 583 An automata-based approach to synthesize untimed operating procedures in batch
chemical processes

INDUSTRIAL CHEMISTRY, POLYMER, FLUIDIZATION, PARTICLE TECHNOLOGY

Farhad Karimi, 595 Conditional monitoring of moisture content in a fluidized bed dryer by the acous-
Rahmat Sotudeh-Gharebagh, tic emission signature
Reza Zarghami, Mojgan Abbasi,
and Navid Mostoufi

ENERGY

Maryam Molashahi 601 Experimental study and artificial neural network simulation of methane adsorp-
and Hassan Hashemipour tion on activated carbon

Seyed Ali Ashrafizadeh, 606 Exergetic and environmental performance improvement in cement production
Majid Amidpour, and Ali Allahverdi process by driving force distribution

Kyung Yoen Won, Byung Hwan Um, 614 Fractionation of barley straw with dilute sulfuric acid for improving hemicellulose
Seung Wook Kim, recovery
and Kyeong Keun Oh

Singaram Vengatesan, Eunae Cho, 621 Development of non-precious oxygen reduction reaction catalyst for polymer elec-
and In-Hwan Oh trolyte membrane fuel cells based on substituted cobalt porphyrins

ENVIRONMENTAL ENGINEERING

Chiou-Liang Lin and Tzu-Huan Peng 627 Evaluation of heavy metal distribution and biological toxicity in agglomeration
bed material during artificial waste incineration in fluidized bed

Mingzhi Huang, Jinquan Wan, 636 Modeling of a paper-making wastewater treatment process using a fuzzy neural
Yan Wang, Yongwen Ma, network
Huiping Zhang, Hongbin Liu,
Zhanzhan Hu, and Changkyoo Yoo

SEPARATION TECHNOLOGY, THERMODYNAMICS

- Sujin Kim, Yun Kyung Choi, Dongmyung Kim, and Moon Sam Shin 644 **Vapor-liquid equilibra for cyclohexane+2-propoxyethanol and cyclohexane+2-butoxyethanol systems**
- Shengnan Li, Heng Zhang, Dandan Han, and Kyung Ho Row 650 **Optimization of enzymatic extraction of polysaccharides from some marine algae by response surface methodology**
- Tahmaseb Hatami, Masoud Rahimi, Hiua Daraei, Ehsan Heidaryan, and Ammar Abdulaziz Alsairafi 657 **PRSV equation of state parameter modeling through artificial neural network and adaptive network-based fuzzy inference system**
- Md. Sohrab Hossain, Md. Fazlul Bari, Samsul Baharin Jamaludin, Kamarudin Hussin, and Mohd. Omar Ab. Kadir 668 **Selective extraction, separation and recovery of Cu(II) in presence of Zn(II) and Ni(II) from leach liquor of waste printed circuit board using microcapsules coated with Cyanex 272**

MATERIALS (organic, inorganic, electronic, thin films)

- Hong Tak Kim, Jun Young Park, and Chinho Park 676 **Effects of nitrogen flow rate on titanium nitride films deposition by DC facing target sputtering method**
- Viet Hung Pham, Thanh Truong Dang, Tran Viet Cuong, Seung Hyun Hur, Byung-Seon Kong, Eui Jung Kim, and Jin Suk Chung 680 **Synthesis of highly concentrated suspension of chemically converted graphene in organic solvents: Effect of temperature on the extent of reduction and dispersibility**
- A-Young Sung and Tae-Hun Kim 686 **Optical application of poly(HEMA-co-MMA) containing silver nanoparticles and N,N-dimethylacrylamide**
