

The Korean Journal of Chemical Engineering

January 2015
Volume 32, Number 1

Korean J. Chem. Eng. 32(1) 1-198
Print ISSN 0256-1115
Online ISSN 1975-7220

REVIEW PAPER

-
- Jacintha Esther, Lala Behari Sukla,
Nilotpala Pradhan, and Sandeep Panda 1 **Fe (III) reduction strategies of dissimilatory iron reducing bacteria**

RAPID COMMUNICATION

-
- Zarook Shareefdeen 15 **Hydrogen sulfide (H₂S) removal using schist packings in industrial biofilter applications**

PROCESS SYSTEMS ENGINEERING, PROCESS SAFETY

-
- Somdutta Singha and Ujjaini Sarkar 20 **Analysis of the dynamics of a packed column using semi-empirical models: Case studies with the removal of hexavalent chromium from effluent wastewater**
- Le Quang Minh, Gyeongmin Kim,
Jongki Park, and Moonyong Lee 30 **Bubble point measurement and high pressure distillation column design for the environmentally benign separation of zirconium from hafnium for nuclear power reactor**

TRANSPORT PHENOMENA

-
- George Angelov
and Christophe Gourdon 37 **Energy consumption of the flow in pulsed extraction columns with internals of discs and rings (doughnuts)**
- Xiaoyi Wang, Zhaoping Zhong,
Heng Wang, and Zeyu Wang 43 **Application of Hilbert-Huang transformation in fluidized bed with two-component (biomass particles and quartz sands) mixing flow**

CATALYSIS, REACTION ENGINEERING

-
- Hwimin Seo, Da Young Min,
Na Young Kang, Won Choon Choi,
Sunyoung Park, Yong-Ki Park,
and Deuk Ki Lee 51 **Development of the Al₂O₃-supported NaNO₃-Na₂Mg(CO₃)₂ sorbent for CO₂ capture with facilitated sorption kinetics at intermediate temperatures**
- Duc Ba Nguyen and Won Gyu Lee 62 **Comparison of different applied voltage waveforms on CO₂ reforming of CH₄ in an atmospheric plasma system**
- Saida Mnasri-Ghnimi
and N. Frini-Srasra 68 **Catalytic wet peroxide oxidation of phenol over Ce-Zr-modified clays: Effect of the pillaring method**

ENERGY

-
- Zhaoting Pu, Jie Mi, Jian Kang,
and Shuaiguo Zhang 74 **Kinetics and activation energy of solvent swelling of coal altered by an ultrasonication-enhanced process**
- Sasithorn Sunphorka,
Keerati Prapaiwatcharapan,
Napida Hinchiranan,
Kunn Kangvansaichol,
and Prapan Kuchonthara 79 **Biocrude oil production and nutrient recovery from algae by two-step hydrothermal liquefaction using a semi-continuous reactor**

ENVIRONMENTAL ENGINEERING

-
- Sara Haddadi Khorzughy,
Teymur Eslamkish,
Faramarz Doulati Ardejani,
and Mohammad Reza Heydartaemeh 88 **Cadmium removal from aqueous solutions by pumice and nano-pumice**

- Morteza Sadeghi, Hajar Taheri Afarani, and Zohreh Tarashi 97 **Preparation and investigation of the gas separation properties of polyurethane-TiO₂ nanocomposite membranes**
- Khaled Hosni, Omar Abdelkarim, Najoua Frini-Srasra, and Ezzeddine Srasra 104 **Synthesis, structure and photocatalytic activity of calcined Mg-Al-Ti-layered double hydroxides**

BIOTECHNOLOGY

- Eun-Jung Lee, Wa Gao, and Jin-Woo Lee 113 **Enhanced production of carboxymethylcellulase of *Bacillus subtilis* subsp. *subtilis* A-53 by a recombinant *Escherichia coli* JM109/A-53 with pH and temperature shifts**
- M. Geetha Devi, Susmita Dutta, Ashraf Talib Al Hinai, and S. Feroz 118 **Studies on encapsulation of Rifampicin and its release from chitosan-dextran sulfate capsules**

SEPARATION TECHNOLOGY, THERMODYNAMICS

- Xiaonan Tang, Yueyun Li, Runhai Chen, Fanlian Min, Juanjuan Yang, and Yunhui Dong 125 **Evaluation and modeling of methyl green adsorption from aqueous solutions using loofah fibers**
- Yuvaraja K., Sanjoy Kumar Das, and Jasmina Khanam 132 **Process optimization and characterization of carvedilol solid dispersion with hydroxypropyl- β -cyclodextrin and tartaric acid**
- Yi Zhang, Weiwei Jian, Yangchun Zhan, Yongchen Song, Mingjun Yang, Jiafei Zhao, Yu Liu, Weiguo Liu, and Yong Shen 141 **Density measurement and equal density temperature of CO₂+brine from Dagang - formation from 313 to 363 K**
- Yaghoub Mansourpanah, Ali Kakanejadifard, Fatemeh Goudarzi Dehrizi, Meisam Tabatabaei, and Hamid Soltani Afarani 149 **Increasing and enhancing the performance and antifouling characteristics of PES membranes using acrylic acid and microwave-modified chitosan**
- Hooman Adib, Shadi Hassanajili, Mohammad Reza Sheikhi-Kouhsar, Abdolhamid Salahi, and Toraj Mohammadi 159 **Experimental and computational investigation of polyacrylonitrile ultrafiltration membrane for industrial oily wastewater treatment**
- Suman Gahlyan, Manju Rani, Inkyu Lee, Il Moon, and Sanjeev Kumar Maken 168 **Measurement and correlation of excess molar volumes for mixtures of 1-propanol and aromatic hydrocarbons**

MATERIALS (Organic, Inorganic, Electronic, Thin Films)

- Hongyeol Park, Dae Hoon Yeom, Jaegyeong Kim, and Jung Kyoo Lee 178 **MnO/C nanocomposite prepared by one-pot hydrothermal reaction for high performance lithium-ion battery anodes**

POLYMER, INDUSTRIAL CHEMISTRY

- Mohammad Zuber, Khalid Mahmood Zia, Muhammad Ashair Iqbal, Zahida Tariq Cheema, Muhammad Ishaq, and Tahir Jamil 184 **Synthesis and characterization of polyurethane based on aliphatic diisocyanate and stiff chain extenders**
- Sonia Zulfiqar, Irum Fatima, and Muhammad Ilyas Sarwar 191 **Property profile of nanostructured blends of amine functionalized elastomer and epoxy**
