

RAPID COMMUNICATION

Hee Jin Jang, Suji Kim,
and Ki Bong Lee

- 1 **Simplified synthesis of K_2CO_3 -promoted hydrotalcite based on hydroxide-form precursors: Effect of Mg/Al/ K_2CO_3 ratio on high-temperature CO_2 sorption capacity**

PROCESS SYSTEMS ENGINEERING, PROCESS SAFETY

Minhyun Kim, Dongwoo Kim,
Iman Janghorban Esfahani,
Seungchul Lee, Minjeong Kim,
and Changkyoo Yoo

- 6 **Performance assessment and system optimization of a combined cycle power plant (CCPP) based on exergoeconomic and exergoenvironmental analyses**

TRANSPORT PHENOMENA

Conghui Gu, Chao Zhang, Xin Zhang,
Naihong Ding, Bin Li, and Zhulin Yuan

- 20 **Modeling and simulation of drying characteristics on flexible filamentous particles in rotary dryers**

CATALYSIS, REACTION ENGINEERING

Zixiang Cui, Jie Fan, Huijuan Duan,
Junfeng Zhang, Yongqiang Xue,
and Yisheng Tan

- 29 **Effect of calcination atmospheres on the catalytic performance of nano- CeO_2 in direct synthesis of DMC from methanol and CO_2**

Yu-Ri Lee, Seung-Hwan Hong,
and Wha-Seung Ahn

- 37 **Extrapolation of the Clausius-Clapeyron plot for estimating the CO_2 adsorption capacities of zeolites at moderate temperature conditions**

Jian Rong, Tao Zhang, Fengxian Qiu,
and Mingliang Chen

- 41 **Structural evolution of hierarchical porous NiO/Al_2O_3 composites and their application for removal of dyes by adsorption**

ENERGY

Jin Wook Lee, Seok Woo Chung,
Sang Oh Ryu, Ji Eun Lee,
Yongseung Yun, Chan Lee,
Yongjeon Kim, and Sungkwang Lim

- 54 **Pneumatic transport characteristics of coarse size pulverized coal for the application of fast circulating fluidized bed gasification**

Heewon Shin, Kyochan Kim,
Joo-Young Jung, Sungchul Charles Bai,
Yong Keun Chang, and Jong-In Han

- 62 **Harvesting of *Scenedesmus obliquus* cultivated in seawater using electro-flotation**

ENVIRONMENTAL ENGINEERING

- Mehran Chitan, Seyed Ali Hosseini, Dariush Salari, Aligholi Niaei, and Habib Mehrizadeh 66 **Synthesis of γ -alumina nano powder from Nepheline syenite**
- Hsiu-Po Kuo, Shang-Wen Yao, An-Ni Huang, and Wan-Yi Hsu 73 **Photocatalytic degradation of toluene in a staged fluidized bed reactor using TiO₂/silica gel**
- Jeong Min Jeong, Ji Hye Park, Jeong Hun Baek, Ra Hyun Hwang, Sang Goo Jeon, and Kwang Bok Yi 81 **Effect of acid treatment of Fe-BEA zeolite on catalytic N₂O conversion**
- Abbas Ghareghashi, Farhad Shahraki, Kiyanoosh Razzaghi, Sattar Ghader, and Mohammad Ali Torangi 87 **Enhancement of gasoline selectivity in combined reactor system consisting of steam reforming of methane and Fischer-Tropsch synthesis**
- Mi Sun Lee, Kyun Young Park, Hoey Kyung Park, Tae Won Kang, Hee Dong Jang, Sang Sup Han, and Jong-Ki Jeon 100 **Prospective application of carbon-silica derived from SiC-Si sludge as a support for Fe catalysts**

BIOTECHNOLOGY

- Mary Grace Baylon, Yokimiko David, Sudheer D. V. N. Pamidimarri, Kei-Anne Baritugo, Cheol Gi Chae, You Jin Kim, Tae Wan Kim, Min-Sik Kim, Jeong Geol Na, and Si Jae Park 105 **Bio-solubilization of the untreated low rank coal by alkali-producing bacteria isolated from soil**
- Jundong Zhu, Linhuo Gan, Baoxia Li, and Xin Yang 110 **Synthesis and characteristics of lignin-derived solid acid catalysts for microcrystalline cellulose hydrolysis**
- Kumar Sanjay, Ashish Prabhu Anand, Venkata Dasu Veeranki, and Pakshirajan Kannan 118 **Kinetics of growth on dual substrates, production of novel glutaminase-free L-asparaginase and substrates utilization by *Pectobacterium carotovorum* MTCC 1428 in a batch bioreactor**
- Guangming Li, Jihong Li, Shizhong Li, Xu Zu, Lei Zhang, Lisong Qi, and Weiliang Xu 127 **Extraction of bioethanol from fermented sweet sorghum bagasse by batch distillation**
- Youbin Park and Bumsang Kim 133 **Skin permeability of compounds loaded within dissolving microneedles dependent on composition of sodium hyaluronate and carboxymethyl cellulose**
- Don-Sang You, Yeon Woong Lee, Dubok Choi, Young-Cheol Chang, and Hoon Cho 139 **Algicidal effects of thiazolinedione derivatives against *Microcystis aeruginosa***

SEPARATION TECHNOLOGY, THERMODYNAMICS

- Taleb Zarei, Masoud Farsiani, and Jamshid Khorshidi 150 **Hydrodynamic characteristics of valve tray: Computational fluid dynamic simulation and experimental studies**
- Gholamreza Bakeri, Masoud Rezaei-DashtArzhandi, Ahmad Fauzi Ismail, Takeshi Matsuura, Mohd Sohaimi Abdullah, and Ng Be Cheer 160 **Porous polyethersulfone hollow fiber membrane in CO₂ separation process via membrane contactor - The effect of nonsolvent additives**
- Hui Chao Lv and Da Yong Tian 170 **Modeling of the phase equilibria of aqueous two-phase systems using three-dimensional neural network**
- Swapnila Roy, Papita Das, and Shubhalakshmi Sengupta 179 **Thermodynamics and kinetics study of defluoridation using Ca-SiO₂-TiO₂ as adsorbent: Column studies and statistical approach**
- Min Chan Kim 189 **Magnetic field effect on the onset of Soret-driven convection of a nanofluid confined within a Hele-Shaw cell**

- Boreum Lee and Hankwon Lim 199 **Parametric studies for CO₂ reforming of methane in a membrane reactor as a new CO₂ utilization process**
- Zhijuan Huang, Chao Yu, Weilan Xue, Fucong Lin, and Zuoxiang Zeng 206 **Solubility and dissolution thermodynamics of hexaquoiron(III)tris(*p*-toluene-sulfonate) in (ethanol+water) binary mixtures within 291.15-333.15 K**
- Kyeong-Ho Lee, So-Jin Park, and Young-Yoon Choi 214 **Density, refractive index and kinematic viscosity of MIPK, MEK and phosphonium-based ionic liquids and the excess and deviation properties of their binary systems**

MATERIALS (Organic, Inorganic, Electronic, Thin Films)

- Chilakala Ramakrishna, Thriveni Thenepalli, Choon Han, and Ji-Whan Ahn 225 **Synthesis of aragonite-precipitated calcium carbonate from oyster shell waste via a carbonation process and its applications**
- Inho Kim, Soo-Hong Lee, Byungkwon Lim, Bum Jun Park, Suk Ho Bhang, and Taekyung Yu 231 **Aqueous-phase synthesis of metal nanoparticles using phosphates as stabilizers**

POLYMER, INDUSTRIAL CHEMISTRY

- Shahriar Mahdavi, Nadereh Amini, Hajar Merrikhpour, and Davoud Akhzari 234 **Characterization of bare and modified nano-zirconium oxide (ZrO₂) and their applications as adsorbents for the removal of bivalent heavy metals**
- Deoukchen Ghim and Jung Hyeun Kim 245 **Fabrication of acrylic copolymer with aluminum nitride fillers and its physical and thermal properties**
- Vishal Suresh Chandane, Ajit Pralhad Rathod, Kailas Lachchharam Wasewar, and Shriram Shaligram Sonawane 249 **Esterification of propionic acid with isopropyl alcohol over ion exchange resins: Optimization and kinetics**

FLUIDIZATION, PARTICLE TECHNOLOGY

- Talib Mohammed Albayati, Ghanim Magbol Alwan, and Omar Sabah Mahdy 259 **High performance methyl orange capture on magnetic nanoporous MCM-41 prepared by incipient wetness impregnation method**
- Beom-Seok Seo, Jae-Yun Han, Kwan-Young Lee, Dong-Won Kim, and Shin-Kun Ryi 266 **Electroless Pd deposition on a planar porous stainless steel substrate using newly developed plating rig and agitating water bath**

RETRACTION NOTE..... 273
