

RAPID COMMUNICATION

Junwoo Lee, Hyuntae Choi,
Seyoung Lim, Gil Hwan Ahn,
Jong Gyu Paik, Byung Tae Ryu,
Yong Ha Kim, and Yong Sun Won

- 321 **The robustness of titanium hydride potassium perchlorate (THPP) for long-term stability of pyrotechnic mechanical devices (PMDs)**

PROCESS SYSTEMS ENGINEERING, PROCESS SAFETY

- Kyeongwoo Jeon, Seeyub Yang,
Dongju Kang, Jonggeol Na,
and Won Bo Lee 325 **Development of surrogate model using CFD and deep neural networks to optimize gas detector layout**
- Kwanghee Lee, Byeonggil Lyu,
Hyungtae Cho, Chanho Park,
Sunghyun Cho, Sambae Park,
and Il Moon 333 **Development of a hazardous material selection procedure for the chemical accident response manual**
- Kyungtae Park, Soung-Ryong Oh,
and Wangyun Won 345 **Techno-economic optimization of the integration of an organic Rankine cycle into a molten carbonate fuel cell power plant**
- Rodrigue Tchamna,
Muhammad Abdul Qyyum,
Muhammad Zahoor, Camille Kamga,
Ezra Kwok, and Moonyong Lee 356 **Analytical design of constraint handling optimal two parameter internal model control for dead-time processes**

CATALYSIS, REACTION ENGINEERING

- Jung Hyeon Kim, Young Shin Jang,
Jae Chang Kim, and Dong Hyun Kim 368 **Anodic aluminum oxide supported Cu-Zn catalyst for oxidative steam reforming of methanol**
- Qiang Lu, Zulfiqar Ali, Hao Tang,
Tahir Iqbal, Zulqarnain Arain,
Min-shu Cui, Ding-jia Liu,
Wen-yan Li, and Yong-ping Yang 377 **Regeneration of commercial SCR catalyst deactivated by arsenic poisoning in coal-fired power plants**
- Jianfeng Miao, Xiaoyue Liu,
Hong Jiang, Yefei Liu, and Rizhi Chen 385 **Pd nanoparticles immobilized on TiO₂ nanotubes-functionalized ceramic membranes for flow-through catalysis**

ENERGY

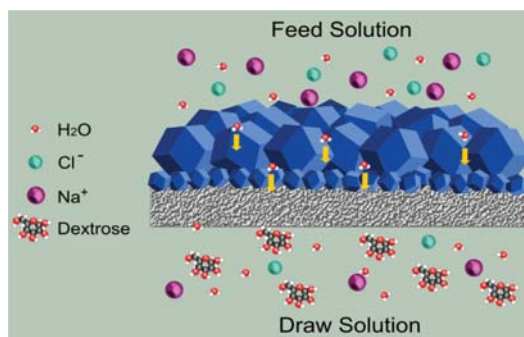

- Arash Tahmasebi, Kristina Maliutina,
and Jianglong Yu 393 **Impact of pressure on the carbon structure of char during pyrolysis of bituminous coal in pressurized entrained-flow reactor**
- Jong-Keun Park, Changkook Ryu,
Sung Ho Lee, and Woohyun Jung 404 **Design evaluation of diesel-oxygen diffusion flame burner for start-up of high-pressure coal gasifier**

ENVIRONMENTAL ENGINEERING

-
- | | | |
|--|-----|---|
| Xiaoling Wang, Hai Lu, Tiehong Song, and Ke Zhao | 411 | The effects of main anoxic section oxidation-reduction potential on the metabolism of PHA and TP in continuous-flow single-sludge treatment system |
| Abraham Efraim Rodríguez-Mata, Leonel Ernesto Amabilis-Sosa, Adriana Roé-Sosa, José Manuel Barrera-Andrade, Jesús Gabriel Rangel-Peraza, and María G. Salinas-Juárez | 423 | Quantification of recalcitrant organic compounds during their removal test by a novel and economical method based on chemical oxygen demand analysis |
| Apip Amrullah, Nattacha Paksung, and Yukihiko Matsumura | 433 | Cell structure destruction and its kinetics during hydrothermal treatment of sewage sludge |

SEPARATION TECHNOLOGY, THERMODYNAMICS

-
- | | | |
|--|-----|--|
| Nizar Mu'ammam Mahpoz, Norfazliana Abdullah, Mohamad Zahir Mohd Pauzi, Mukhlis A. Rahman, Khairul Hamimah Abas, Azian Abd Aziz, Mohd Hafiz Dzarfan Othman, Juhana Jaafar, and Ahmad Fauzi Ismail | 439 | Synthesis and performance evaluation of zeolitic imidazolate framework-8 membranes deposited onto alumina hollow fiber for desalination |
|--|-----|--|

- | | | |
|---|-----|---|
| Liying Liu, Xudong Chen, Yushun Wang, Tao Du, and Gang Li | 450 | Synthesis of fly ash-based microporous copper silicate for CO₂ capture from humid flue gases |
| Debashis Kundu, Sankar Chakma, Gopal Pugazhenth, and Tamal Banerjee | 456 | Reactive insights into the hydrogen production from ammonia borane facilitated by phosphonium based ionic liquid |

MATERIALS (Organic, Inorganic, Electronic, Thin Films)

-
- | | | |
|---|-----|---|
| Sangeeta Adhikari and Do-Heyoung Kim | 468 | Influence of surfactant on the synthesis of BiOCl/WO₃ microcomposites for enhanced adsorption in aqueous solutions |
| Noor Nazihah Bahrudin and Mohd Asri Nawi | 478 | Effects of montmorillonite on the enhancement of physicochemical, optical and photocatalytic properties of TiO₂/chitosan bilayer photocatalyst |
| Zahra Vaseghi, Omid Tavakoli, and Ali Nematollahzadeh | 489 | New insights into mechanistic aspects and structure of polycrystalline Cu/Cr/Ni metal oxide nanoclusters synthesized using <i>Eryngium campestre</i> and <i>Froriepia subpinnata</i> |
| Kyuhwan Hyun, Suhyeon Kang, and Yongchai Kwon | 500 | Performance evaluation of glucose oxidation reaction using biocatalysts adopting different quinone derivatives and their utilization in enzymatic biofuel cells |
