REVIEW PAPER

Bomin Kim, Yongjun Choi,
Jihyeok Choi, Yonghyun Shin,
and Sangho Lee

- 1 **Effect of surfactant on wetting due to fouling in membrane distillation membrane: Application of response surface methodology (RSM) and artificial neural networks (ANN)**

PROCESS SYSTEMS ENGINEERING, PROCESS SAFETY

Byeong Eon Park, Ji Seon Kim,
Jeong-Keun Lee, and In-Beum Lee

- 11 **Anomaly detection in a hyper-compressor in low-density polyethylene manufacturing processes using WPCA-based principal component control limit**

TRANSPORT PHENOMENA

Afrasyab Khan, Mohd Sobri Takriff,
Masli Irwan Rosli,
Nur Tantiyani Ali Othman,
Khairuddin Sanauallah,
Andrew Ragai Henry Rigit,
Ajmal Shah, and Atta Ullah

- 19 **Flow characteristics within the wall boundary layers of swirling steam flow in a pipe comprising horizontal and inclined sections**

Yanhai Lin and Meng Yang

- 37 **The effects of radiation on heat and mass transfer of magnetohydrodynamic Marangoni flow in the boundary layer over a disk**

CATALYSIS, REACTION ENGINEERING

Ayşe Ezgi Ünlü, Azime Arıkaya,
Aybike Altundağ, and Serpil Takaç

- 46 **Remarkable effects of deep eutectic solvents on the esterification of lactic acid with ethanol over Amberlyst-15**

Yang Gao, Jun Xiao, Jiandong Ye,
Xiaodong Huo, and Yutong Shen

- 54 **Catalytic oxidation of benzene over alumina-supported Cu-Mn-Ce mixed oxide catalysts**

Vu Thi Thuy Hang
and Young-Min Chung

- 65 **Direct synthesis of H₂O₂ over Pd/C catalysts prepared by the incipient wetness impregnation method: Effect of heat treatment on catalytic activity**

ENVIRONMENTAL ENGINEERING

Bijan Rezaei, Siavash Riahi,
and Ali Ebrahimpoor Gorji

- 72 **Molecular investigation of amine performance in the carbon capture process: Least squares support vector machine approach**

Shirin Afshin, Yusef Rashtbari,
Bahman Ramavandi, Mehdi Fazlzadeh,
Mehdi Vosoughi,
Seyad Ahmad Mokhtari,
Mohammad Shirmardi,
and Rabia Rehman

- 80 **Magnetic nanocomposite of filamentous algae activated carbon for efficient elimination of cephalixin from aqueous media**

Seyedeh Mahtab Pormazar,
Mohammad Hassan Ehrampoush,
Mohammad Taghi Ghaneian,
Mehdi Khoobi, Parvaneh Talebi,
and Arash Dalvand

- 93 **Application of amine-functionalized Fe₃O₄ nanoparticles with HPEI for effective humic acid removal from aqueous solution: Modeling and optimization**

Beom-Geun Kim, Md Akhte Khirul,
Daechul Cho, and Sung-Hyun Kwon

- 105 **The effect of calcium peroxide originating from oyster shell powder on control of phosphorus compounds in oceanic sediment**

Rekha Panda, Om Shankar Dinkar,
Manis Kumar Jha,
and Devendra Deo Pathak

- 111 **Recycling of gold from waste electronic components of devices**

- Christian Ariane Santos, 120 **Decomposition of indoor VOC pollutants using non-thermal plasma with gas recycling**
Nguyen Hoang Phuong,
Mi Jeong Park, Sang Bum Kim,
and Young Min Jo

SEPARATION TECHNOLOGY, THERMODYNAMICS

- Shahreen Izwan Anthonysamy, 130 **Low temperature adsorption of nitric oxide on cerium impregnated biomass-derived biochar**
Pooya Lahijani, Maedeh Mohammadi,
and Abdul Rahman Mohamed
- Raja Norimie Raja Sulaiman, 141 **Extraction of reactive dye via synergistic Aliquat 336/D2EHPA using emulsion liquid membrane system**
Hilmi Abdul Rahman,
Norasikin Othman,
Muhammad Bukhari Rosly,
Norela Jusoh,
and Norul Fatiha Mohd Noah
- Ki Hun Park and Minjun Cha 151 **Gas hydrate formation by allyl alcohol and CH₄: Spectroscopic and thermodynamic analysis**
- In-Soo Kang, Yo-Seob Shin, 159 **Study of mercury-adsorption behavior in the exhaust gas of KI-impregnated ACF**
Byung Chan Kwon, No-Kuk Park,
Tae Jin Lee, Seung Woo Lee,
and Myung Jo Seo

MATERIALS (Organic, Inorganic, Electronic, Thin Films)

- Lei Fan, Peizheng Sun, Li Yang, 166 **Facile and scalable synthesis of nitrogen-doped ordered mesoporous carbon for high performance supercapacitors**
Zhilong Xu, and Jie Han
- Jongwon Yang, Seungwon Yang, 176 **Carbon supported palladium-copper bimetallic catalysts for promoting electrochemical oxidation of formic acid and its utilization in direct formic acid fuel cells**
Yongjin Chung, and Yongchai Kwon
- Haebeen Kim, Duri Kim, 184 **Electrochemical characteristics of high-capacity Mg/V₂O₅ hybrid batteries with Mg-Li dual salt electrolytes**
Min Young Hong, and Ji Heon Ryu
