INVITED REVIEW PAPER

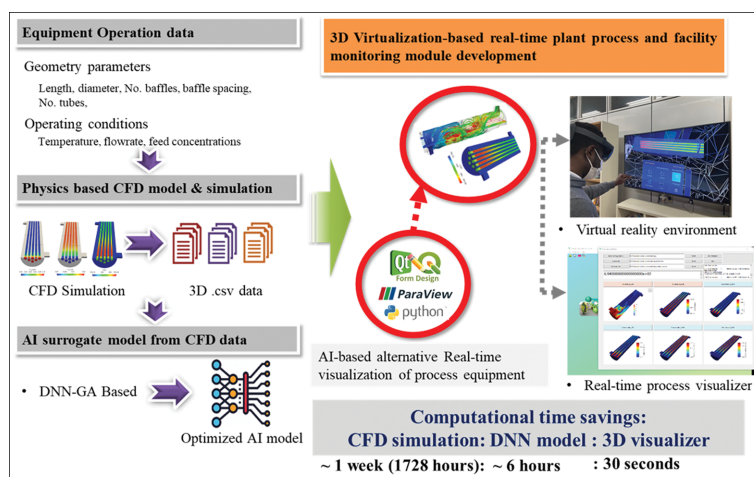

B. Wayne Bequette 1 **100 Years of insulin: A chemical engineering perspective**

REVIEW PAPER

Gaoliang Liao, Yuntao Du, Feng Zhang, and Jiaqiang E 11 **Comprehensive review on physical properties of supercritical carbon dioxide calculated by molecular simulation**

PROCESS SYSTEMS ENGINEERING, PROCESS SAFETY

Dela Quarme Gbadago, Jiyoung Moon, and Sungwon Hwang 37 **Exploring advanced process equipment visualization as a step towards digital twins development in the chemical industry: A CFD-DNN approach**

Jeil Park, Wonhyeong Lee, and Jae W. Lee 46 **Droplet size distribution in a biphasic liquid reactor for understanding the impact of various dual impeller designs on the morphology of S-PVC**

TRANSPORT PHENOMENA

Pengfei Qin, Zhaojie Xia, and Li Guo 57 **A deep learning approach using temporal-spatial data of computational fluid dynamics for fast property prediction of gas-solid fluidized bed**

Runze Cai, Enbo Ju, Wenyi Chen, and Jiao Sun 67 **Different modes of bubble migration near a vertical wall in pure water**

Huibo Meng, Yunjuan Yao, Yanfang Yu, Bowen Shi, and Pengcheng Ding 79 **Enhancement analysis of turbulent flow and heat transfer of supercritical CO₂ in a static mixer with three helical blades**

CATALYSIS, REACTION ENGINEERING

Young-Kwon Park, Sang-Chul Jung, Ho-Young Jung, and Sang Chai Kim 91 **Catalytic removal of VOCs using Pt loaded on used battery derived Zn**

Tae In Park, Seong Ho Lee, and Kwan-Young Lee 97 **Characteristics of La-doped Pt/Al₂O₃ catalyst prepared by solvent-deficient method and effect on enhancement of dehydrogenation of perhydrodibenzyltoluene**

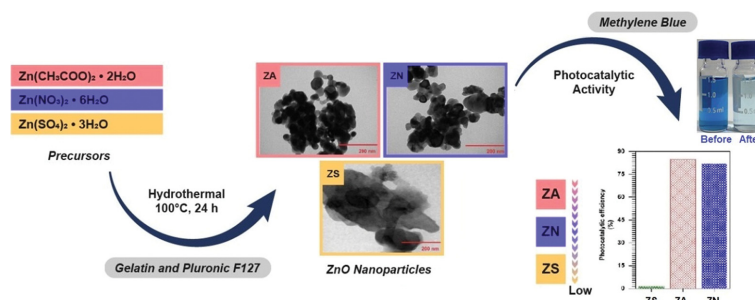

Ying Cheng, Wei Zhang, Biqing Shi,
Siqi Li, Bing Dong, Yulian Quan,
and Xianbin Ji

104 **Improved the hydrogen sorption properties of MgH_2 by CeMnZr solid solution**

ENVIRONMENTAL ENGINEERING

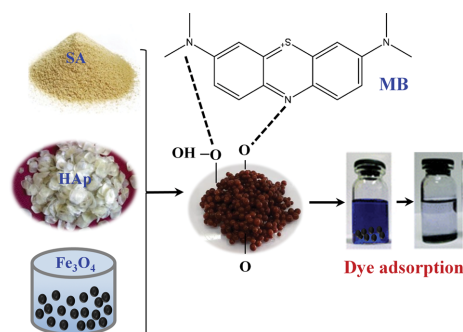

Didik Prasetyoko, Novia Amalia Sholeha,
Riki Subagyo, Maria Ulfa,
Hasliza Bahruji, Holilah Holilah,
Mokhammad Fajar Pradipta,
and Aishah Abdul Jalil

112 **Mesoporous ZnO nanoparticles using gelatin - Pluronic F127 as a double colloidal system for methylene blue photodegradation**

Mahboubeh Jourbonyan,
Mehrnaz Safarnia, Foad Raji,
and Ahmad Davvand Koochi

124 **Magnetic sodium alginate/hydroxyapatite nanocomposite as an efficient bio-sorbent for rapid adsorption of methylene blue**

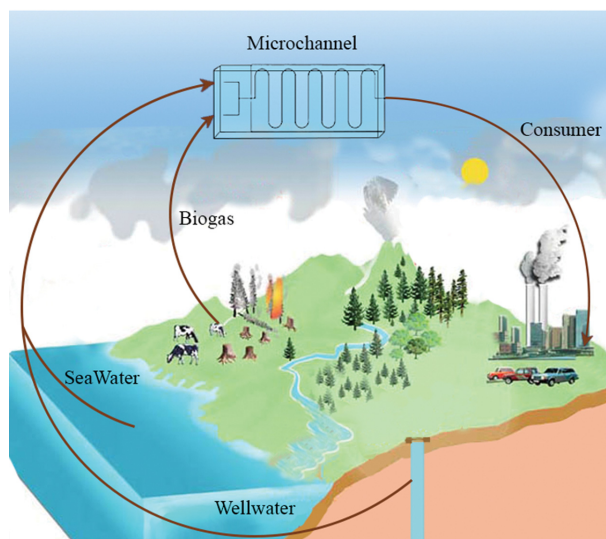

Su Bin Kang, Zhuo Wang,
and Sung Wook Won

136 **Polyethylenimine-crosslinked calcium silicate hydrate derived from oyster shell waste for removal of Reactive Yellow 2**

Sara Behaien, Babak Aghel,
and Mostafa Safdari Shadloo

145 **Application of water scrubbing technique for biogas upgrading in a microchannel**

Rumaisa Tariq, Abrar Inayat,
Muhammad Shahbaz, Hassan Zeb,
Chaouki Ghenai, Tareq Al-Ansari,
and Jaehoon Kim

155 **Kinetic and thermodynamic evaluation of pyrolysis of jeans waste via coats-redfern method**

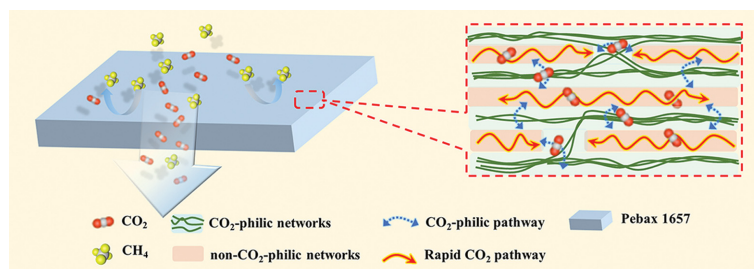

Chaoke Bulin, Ting Guo,
Ruichao Zhao, Rongxiang Zheng,
Bangwen Zhang, and Fang Liu

162 **Species resolved interaction mechanism between graphene oxide and Cu(II) in aqueous solution with implications on wastewater remediation**

SEPARATION TECHNOLOGY, THERMODYNAMICS

Jiangnan Wang, Xia Lv, Lu Huang,
Long Li, Xueqin Li, and Jinli Zhang

175 **Construction of amphiphilic networks in blend membranes for CO₂ separation**

Sayed Mohsen Hosseini,
Sima Mohammadianfar,
Samaneh Koudzari Farahani,
and Sadra Solhi

185 **Polyether sulfone-graphite nanocomposite for nanofiltration membrane with enhanced separation, antifouling and antibacterial properties**

Hongdan Wu, Xiaodi Liu, Xiaoyu Yang,
Chuanzhi Hu, and Zhihui Zhou

195 **Pervaporation performance of BTESE/TEOS-derived organosilica membrane and its stability in isopropanol aqueous solutions**

Byoung Chul Kim, Jin Whan Park,
and Young Han Kim

205 **Downstream process development of biobutanol using deep eutectic solvent**

Hongjuan Bai, Qiaofei Zhang,
Xuan Zhou, Junhang Chen,
Zihan Chen, Zhuangzhuang Liu,
Jun Yan, and Jing Wang

215 **Removal of fluoroquinolone antibiotics by adsorption of dopamine-modified biochar aerogel**

Xia Li, Dongmin Yue, Fei Liu,
Jingtong Yu, Bingbing Li, De Sun,
and Xin Ma

223 **Acid-doped polyaniline membranes for solar-driven interfacial evaporation**

MATERIALS (Organic, Inorganic, Electronic, Thin Films)

Asmae Bouoidina, Rajesh Haldhar,
Rajae Salim, Elhachmia Ech-chihbi,
Hamza Ichou, Fadoua El-Hajjaji,
Seong-Cheol Kim, Brahim El Ibrahimi,
Savas Kaya, and Mustapha Taleb

235 **An effective and smart corrosion inhibitor in acidic environment: Experimental & theoretical studies**

POLYMER, INDUSTRIAL CHEMISTRY

Sudipta Let, Nirjhar Bar,
Ranjan Kumar Basu,
and Sudip Kumar Das

248 **Minimum elutriation velocity of the binary solid mixture - Empirical correlation and genetic algorithm (GA) modeling**

Xu Zhao, Yucheng Su,
Hongqiang Wang, Zhiwu Lei,
Eming Hu, Fang Hu, Qingliang Wang,
Lechang Xu, Shiyao Fan, Xinwei Liu,
and Xuanzhang Hao

255 **Modification of activated carbon from agricultural waste lotus leaf and its adsorption mechanism of beryllium**
